

Figure 1: Tux, the Linux mascot

1 Introduction to Markdown

Markdown is a lightweight markup language that allows you to write formatted text using a plain text syntax. It is widely used for creating documentation, writing blog posts, and even formatting messages on platforms like GitHub.

1.1 Titre 1.2

To create headings in markdown, you can use hash symbols (#). The number of hash symbols determines the level of the heading. For example:

- First item
- Second item
- Third item
- Fourth item

1.2 Image example

1. Open the file containing the Linux mascot.
2. Marvel at its beauty.
3. Close the file.

1.3 Code examples

1.3.1 Generic

```
print("Hello, world!")  
for i in range(10):  
    print(i)
```

1.3.2 Python

```
print("Hello, world!")  
for i in range(10):  
    print(i)
```
